

### REMARKS

The Notice of Allowability mailed January 6, 2006 in connection with the above-identified application is gratefully acknowledged.

The specification has been amended to correct inadvertent typographical errors in the chemical structure of compounds EI, EJ, EK, EL, EM, EN, EO, EP, EQ, ER, ES, ET, EU, EW and EZ, as depicted at pages 41-45. Specifically, these compounds, which are illustrative examples of the tetrazole class (Ib), have been amended to correctly depict the tetrazole group in each of these compounds as having four ring nitrogen atoms instead of five ring nitrogen atoms. In addition, compound EO has been further amended to replace the substituent "n-septyl" with "n-heptyl."

During a January 30, 2006, telephonic interview with the Examiner in connection with U.S. application no. 10/197,609, the parent of the present application, the undersigned brought to the attention of the Examiner an office action issued in connection with application No. 11/030,416, filed on January 6, 2005. Application No. 11/030,416 is a continuation of the present application. The Examiner informed the undersigned that the Examiner was aware of the office action and that it was unnecessary for the undersigned to file an Information Disclosure Statement to make the office action of record in the present application.

No fees are believed to be due in connection with this Amendment. However, if any fees are due, please charge any payments to Wilmer Cutler Pickering Hale and Dorr LLP Deposit Account No. 08-0219.

Respectfully submitted,  
WILMER CUTLER PICKERING HALE AND DORR LLP
